

FREE TALK

5G and It's Ramifications - by Chris Baker

**Glastonbury Town Hall
(Small Room)**

**Tuesday, 12th of March 2019
3.30 – 6.30pm**

**The impending dangers of 5G are upon us, as it is set to be installed worldwide,
but what are the implications?**

Known effects of 4G include:

**Insomnia & sleep disorders, as well as melatonin reduction.
Hormonal disturbance, impaired learning, impaired fertility,
increased blood-brain barrier permeability, depressed immune system,
disruption of cell metabolism, DNA damage & cancer,
diabetes and heart attacks, to name but a few.**

**5G uses a very different technology from the 3 & 4G but more importantly
5G HAS NOT BEEN TESTED FOR ITS LONG TERM EFFECTS ON BIOLOGICAL LIFE.**

The talk will be followed by discussion.

**7 pm you are welcome to join us for the monthly council meeting
upstairs to discuss our concerns for 5G.**

Refreshments Will be Provided.

Look forward to seeing you all there.
